

Long-standing MESSRING Managing Director Robert Weber Announces Retirement

Munich, January 19, 2023 - MESSRING Managing Director Robert Weber retired from active professional life on December 31, 2022. With 42 years on the company side - 35 of them as Managing Director - the electrical engineering graduate has played a key role in shaping and managing MESSRING's successful path over the past decades. The Munich-born engineer has not only driven the company's success with his inventive spirit and determination but has also repeatedly played a pioneering role in the further development of test equipment for active and passive vehicle safety on a global scale.

In the future, Robert Weber will continue to support MESSRING in an advisory capacity and contribute his experience and technical expertise, especially for new and further product developments. The management of MESSRING GmbH is now in the hands of Dierk Arp as sole managing director.

About MESSRING:

MESSRING GmbH is the world market leader for crash test technology. Based in the southwest of Munich, the mid-sized company's product offerings range from the realization of large, turnkey and multifunctional crash test facilities to the delivery of compact crash simulation test systems. In close cooperation with automotive engineers and manufacturers, MESSRING develops application specific solutions that enable the automotive industry to test their active and passive vehicle safety systems. With more than 170 employees and over 140 crash and sled test facilities installed worldwide, MESSRING has been contributing to making traffic and transportation safer for over 50 years. As a pioneer in the field of passive safety, MESSRING has set itself the goal of also playing a leading role in active safety. For this reason, MESSRING Active Safety GmbH was founded in 2018, whose core competence is in the development of test systems for driver assistance systems and autonomous vehicles.
